AWARDS ESTABLISHED
Research and Other Sponsored Activities
July 1, 2013 through February 28, 2014

The awards detailed in this list were established July 1, 2013 through February 28, 2014. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

Other Sponsored Activity	688	795	15.6%	\$ 87,972,627	\$ 103,595,602	17.8%

February 2014 again saw an increase in the total number of awards as compared to February 2013. It also saw an increase in total award dollars as compared to the same period last year, breaking the trend of the past few months. This increase is due in part to a modest gain in the category Research Awards as well as a substantial increase in number and amount of Other Sponsored Activity for February 2014 as compared to a year ago.
