

AWARDS ESTABLISHED
Research and Other Sponsored Activities
July 1, 2010 through March 31, 2011

The awards detailed in this list were established July 1, 2010 through March 31, 2011. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified, as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

Other Sponsored Activity	425	526	23.8%	\$ 60,019,584	\$ 78,043,054	30.0%

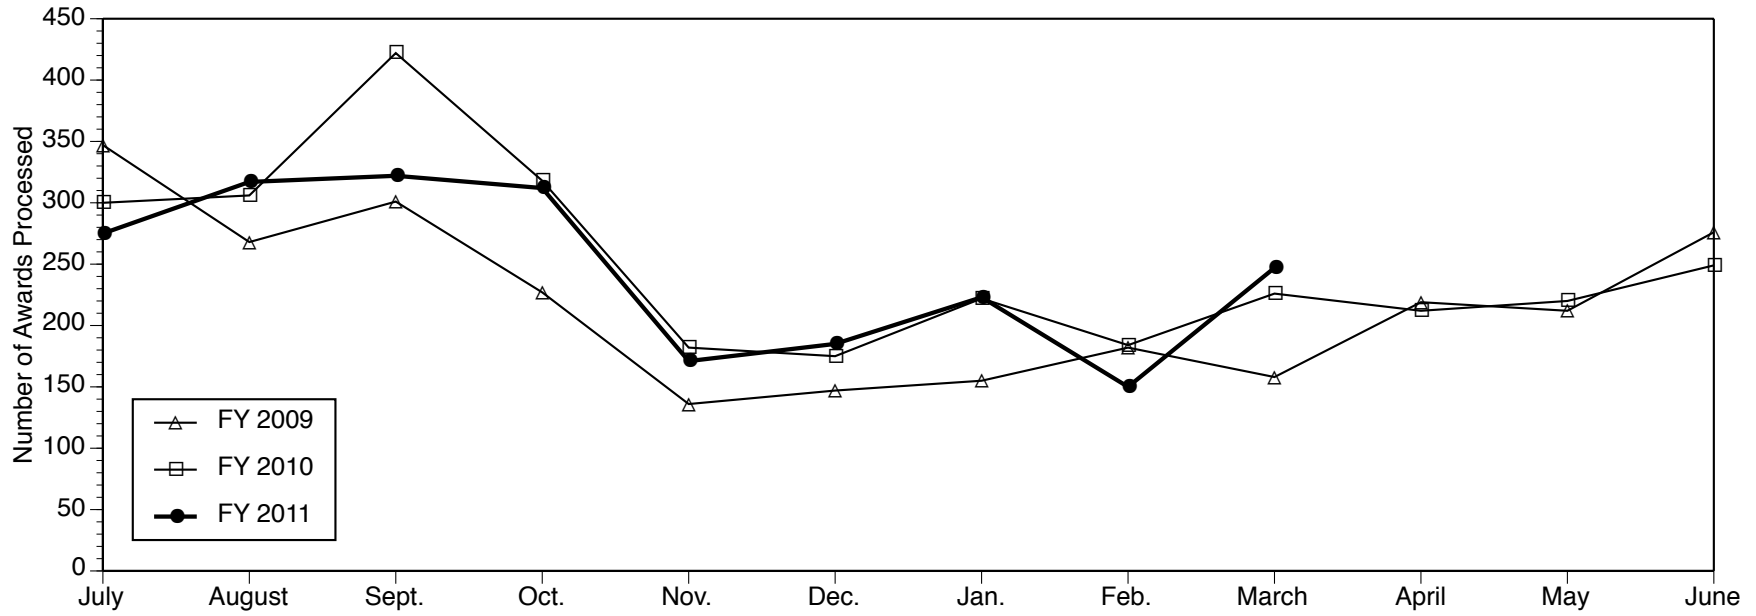

March 2011 total award activity both in number and dollar value are significantly below that of March 2010. However year-to-date total awards show a smaller decline in dollar value. Last year's activity was significantly influenced by the ARRA funding. This year the amount of ARRA funding is insignificant. March's experience continues a trend seen in previous months this fiscal year.
