ACTION REQUEST: Approval of a Professional Administrative Appointment

NAME: Daryl C. Weinert

RECOMMENDED TITLE: Associate Vice President for Research - Sponsored Projects

EFFECTIVE DATE: May 1, 2012

I am pleased to recommend the appointment of Daryl C. Weinert as associate vice president for research - sponsored projects, Office of the Vice President for Research, effective May 1, 2012.

Mr. Weinert earned a combined B.A. degree in economics and B.S. degree in industrial and operations engineering from the University of Michigan in 1986. He has extensive experience in accounting, corporate finance, financial analysis, marketing and implementing cost reductions and process improvements. In 1999 he joined the College of Engineering as the director of Corporate Relations and has held the position of executive director of the Business Engagement Center since 2007.

Mr. Weinert will have oversight of the Office of Research and Sponsored Projects (ORSP) and will provide the leadership to implement desired changes at ORSP that were identified during an extensive review of sponsored program administration in 2011.

It is a pleasure to recommend the appointment of Daryl C. Weinert as associate vice president for research - sponsored projects, Office of the Vice President for Research, effective May 1, 2012.

Respectfully submitted,

Stephen R. Forrest
Vice President for Research

ACTION REQUEST: Academic Administrative Appointment for a Faculty Member

NAME: Anthony W. England

CURRENT TITLES: Professor of Electrical Engineering and Computer Science, with tenure, and Professor of Atmospheric, Oceanic and Space Sciences, without tenure, College of Engineering, University of Michigan - Ann Arbor

ADDITIONAL TITLE: Interim Dean, College of Engineering and Computer Science, University of Michigan - Dearborn

EFFECTIVE DATES: May 1, 2012 through June 30, 2014

On the recommendation of the Provost and Vice Chancellor for Academic Affairs, I am pleased to recommend the appointment of Anthony W. England as interim dean, College of Engineering and Computer Science, University of Michigan - Dearborn, effective May 1, 2012 through June 30, 2014.

Professor England earned his Ph.D. in geophysics from Massachusetts Institute of Technology (MIT). His master's and bachelor's degrees in geology and geophysics, respectively, are also from MIT. He is a scientist and former astronaut with NASA where he served as mission scientist for Apollo's 13 and 16, mission specialist crewman on the Spacelab 2 flight in 1985, and space station program scientist in 1986-87. He is currently a professor of electrical engineering and computer science and atmospheric, oceanic and space sciences in the College of Engineering at the University of Michigan - Ann Arbor.

As a scholar, educator, and administrator, Professor England has 130 peer reviewed publications; he has vigorously supported faculty and student diversity as recognized by the University of Michigan's Harold R. Johnson Diversity Service Award in 2002, as well as the university's NCID Exemplary Diversity Engagement and Scholarship Award in 2009; and he served for five years as associate dean for academic affairs in the College of Engineering on the Ann Arbor campus. His research has included scattering theory applied to the microwave brightness of the earth and other planets, and the development and use of ice-sounding radar for the study of glaciers in Alaska and Antarctica. Currently, his research concerns developing Land-Surface Process/Radiobrightness (LSP/R) models of land-atmosphere energy and moisture fluxes in the Arctic.

Professor England has been a research geophysicist with the U.S. Geological Survey, a visiting professor at Rice University, an associate editor for the Journal of Geophysical Research, a
member of the National Research Council’s Space Studies Board, and chair of several federal committees concerned with science and technology policy. He is also a fellow of IEEE.

Professor England is an innovative researcher and educational leader with a special interest in undergraduate and interdisciplinary education. He is an effective communicator and a strong collaborator. He will apply his experience and leadership to the stewardship of the college and will continue to advance the mission of CECS and its contributions to the region. His appointment at UM-Dearborn represents a continuing and strengthened partnership between two University of Michigan campuses.

I am pleased to recommend the appointment of Anthony W. England as interim dean, College of Engineering and Computer Science, University of Michigan – Dearborn, effective May 1, 2012 through June 30, 2014.

Recommended by:

Daniel Little, Chancellor
University of Michigan–Dearborn
