Subject: University of Michigan Hospitals and Health Centers
       University Hospital
       Computed Tomography Angiography Project

Action Requested: Approval to Proceed with Project

Background:

This project will provide additional access to computed tomography angiography (CTA) technology for interventional procedures. CTA is a technique used to examine the blood vessels in many key areas of the body with more detail than magnetic resonance imaging or ultrasound. This project will renovate two existing radiology rooms, approximately 1,400 gross square feet, in University Hospital to house the new CTA scanner system. The scope of this project includes the architectural, mechanical and electrical work necessary to accomplish these improvements. There will be no impact on parking from this project. A Certificate of Need will be required from the State of Michigan Department of Community Health for this project.

The estimated cost of the project is $4,800,000. Funding will be provided from Hospitals and Health Centers’ resources. The construction cash flow may be provided, all or in part, by increasing the commercial paper issuance under the commercial paper program, secured by a pledge of General Revenues, and authorized by the Board of Regents. The architectural firm of Integrated Design Solutions will design the project. Construction is scheduled to be completed in the fall of 2011.

We recommend that the Board of Regents approve the University of Michigan Hospitals and Health Centers University Hospital Computed Tomography Angiography project as described, authorize commissioning the architectural firm of Integrated Design Solutions, LLC, for its design, and authorize issuing the project for bids and awarding construction contracts providing that bids are within the approved budget.

Respectfully submitted,

Ora Hirsch Pescovitz
Executive Vice President
for Medical Affairs

Timothy P. Slottaw
Executive Vice President and
Chief Financial Officer
