THE UNIVERSITY OF MICHIGAN
REGENTS COMMUNICATION

ACTION REQUEST: Additional Administrative Appointment

NAME: Eric Michielssen

CURRENT TITLE: Professor of Electrical Engineering and Computer Science, with
tenure, College of Engineering

ADDITIONAL TITLE: Associate Vice President for Research — Advanced Research
Computing, Office of the Vice President for Research

EFFECTIVE DATES: August 1, 2013 through July 30, 2016

It is my pleasure to recommend the appointment of Eric Michielssen as associate vice president for research — advanced research computing, Office of the Vice President for Research, effective August. 1, 2013 through July 30, 2016.

Professor Michielssen's responsibilities in this position will be to continue to work with the campus research community to ensure that U-M's advanced research computing infrastructure meets the complex and evolving needs of university researchers in a wide range of disciplines.

Professor Michielssen is a magna cum laude graduate of Katholieke Universiteit Leuven in Belgium with B.S. and M.S. degrees in electrical engineering, and holds a Ph.D. in electrical engineering from the University of Illinois at Urbana Champaign (UIUC). He came to U-M from UIUC in 2005, having held a variety of positions there including associate director of the Center for Computational Electromagnetics. Professor Michielssen has an outstanding history of honors, including the University of Michigan College of Engineering David E. Liddle Research Excellence Award in 2011. He has authored or co-authored nearly 300 journal articles, five books with two more pending, and 11 book chapters. He has also served in numerous editorships, including currently as editor-in-chief of the *International Journal of Numerical Modeling: Electronic Networks, Devices and Fields*. Professor Michielssen's depth of knowledge and scholarly accomplishment in a computationally intensive field give him a great understanding of the need for advanced research computing capabilities on campus. I strongly recommend his appointment.

Respectfully submitted,

Stephen R. Forrest
Vice President for Research

July 2013
