The awards detailed in this list were established July 1, 2015 through August 31, 2015. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

July and August FY2016 continue the trend of increasing number and amounts of awards as seen at the end of FY2015. The increase in awarded proposal totals is due in part to three National Institutes of Health awards to the Institute of Social Research totaling over $38 million. Research training grants for FY2016 also increased over the same July-August period in FY2015 due in part to three large federal training grant awards totaling over $15 million awarded in August 2015. The decrease in the Other Sponsored Activity was due to two uncharacteristically large awards of nearly $21 million awarded in August 2014. Excluding these, the % change for the Other Sponsored Activity for FY2015 to FY2016 is -1.1%.
* Finalized August 2015 expenditure numbers not yet available as of September 3, 2015.
AWARDS ESTABLISHED FOR RESEARCH AND OTHER SPONSORED ACTIVITIES

July 01, 2015 through August 31, 2015

The awards listed here by direct sponsor were established during the month designated in the heading above. For each award, the listing includes the award title, the principal investigator(s), the proposal administrative department, participating investigators with specified effort, the estimated amount awarded for the award period, and the estimated award period.
