The awards detailed in this list were established July 1, 2015 through September 30, 2015. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

September 2015 saw an increase in the year-to-date amounts as compared to September 2014. While the total number of awarded proposals and award amounts is down for the month as compared to September last year, the difference in award amount can be attributed to three large federal awards in September 2014 totaling more than $51 million not repeated this year. September 2015 did see an 8% increase in number and a 25% increase in total amounts for awarded proposals between $1 million and $10 million.
Finalized September 2015 expenditure numbers not yet available as of October 10, 2015.

* Finalized September 2015 expenditure numbers not yet available as of October 10, 2015.
The awards listed here by direct sponsor were established during the month designated in the heading above. For each award, the listing includes the award title, the principal investigator(s), the proposal administrative department, participating investigators with specified effort, the estimated amount awarded for the award period, and the estimated award period.
