Subject: License Agreement between the University of Michigan and Health Patroller, LLC

Action Requested: Approval of License Agreement

Preamble:

A statutory conflict of interest situation was identified by the Office of Technology Transfer while reviewing the technology transfer agreement that then triggered a review by the Medical School Conflict of Interest Board and the UMOR Conflict of Interest Review Committee. A plan for management of the possible risks associated with the conflict of interest was then developed and approved by this Board and Committee and agreed to by the parties involved in this plan.

This proposed license agreement (“Agreement”) falls under the State of Michigan Conflict of Interest Statute because Professors John Hollingsworth and Mark Newman are both employees of the University of Michigan (“University”) and partial owners of Health Patroller, LLC. The law permits such an Agreement provided it is disclosed to the Board of Regents (“Regents”) of the University of Michigan and approved in advance by a 2/3 vote.

Background:

John Hollingsworth, MD, an Associate Professor in the Department of Urology, and Mark Newman, PhD, an Associate Professor in the Department of Information, are partial owners of a for-profit company called Health Patroller, LLC (the “Company”). The Company was formed recently to commercialize a software application for the tracking and management of temporary medical assets and desires to license from the University of Michigan the University’s rights associated with the following technology:

UM OTT File No. 7392, entitled: “Stent Tracker” (Inventors: John Hollingsworth, Mark Newman)

The Office of Technology Transfer selected the Company as a University partner and negotiated the terms of the proposed Agreement in accordance with University policy and its accepted licensing principles.

Parties to the Agreement:

The Regents of the University of Michigan and Health Patroller, LLC
Agreement Terms Include:

Agreement terms include granting the Company an exclusive license with the right to grant sublicenses. The Company will pay a royalty on sales and reimburse any costs. The University may receive equity in the Company, along with the right to purchase more equity.

The University will retain ownership of the licensed technology and may continue to further develop it and use it internally. No use of University services or facilities, nor any assignment of University employees, is obligated or contemplated under the Agreement. Standard disclaimers of warranties and indemnification apply, and the Agreement may be amended by consent of the parties, such as adding related technology. University procedures for approval of these changes will be followed and additional conflict of interest review will be done as appropriate.

Pecuniary Interest:

The pecuniary interests of Drs. Hollingsworth and Newman arise from their ownership interests in Health Patroller, LLC.

Net Effect:

The Office of Technology Transfer has negotiated and finalized the terms of a worldwide exclusive license agreement for intellectual property rights related to UM OTT File No. 7392 for all fields of use. Health Patroller, LLC will obtain use and commercialization rights to the above listed University technology.

Recommendations:

This matter has been reviewed and approved by the Medical School Conflict of Interest Board and the UMOR Conflict of Interest Review Committee. In light of this disclosure and our finding that the Agreement was negotiated in conformance with standard University practices, I recommend that the Board of Regents approve the Agreement between the University and Health Patroller, LLC.

Respectfully submitted,

Rebecca Cunningham
Interim Vice President for Research

October 2019
