

AWARDS ESTABLISHED
Research and Other Sponsored Activities
July 1, 2015 through November 30, 2015

The awards detailed in this list were established July 1, 2015 through November 30, 2015. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

November 2015 saw a slight increase in the number of awards as compared to November 2014 in the categories of research and training. Notably, the large training award of \$2 million for the School of Natural Resources accounted for a substantial increase in research training dollars for the month. Despite the increase in number of research awards for the month as compared to November 2014, total research awards dollars saw a decrease. This was due nearly entirely to a shift of research award amounts ranging from \$400,000 to \$600,000 dropping to lower amounts as compared to November 2014. Year-to-date awards and amounts continue to show increases over the same period in 2014.
