

AWARDS ESTABLISHED
 Research and Other Sponsored Activities
 January 1, 2010 through January 31, 2010

Received by the Regents
 February 18, 2010

The awards detailed in this list were established January 1, 2010 through January 31, 2010. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified, as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

Other Sponsored Activity	365	337	(7.7%)	\$46,818,202	\$34,162,759	(27.0%)

While the number of total awards has increased in January 2010 over the previous January, the dollar value has decreased. There were a greater number of large awards valued in excess of \$1.0 million in January 2009 than in 2010 with the difference in value exceeding \$10 million. The number and dollar of research awards continue to be in positive territory.
