

THE UNIVERSITY OF MICHIGAN
REGENTS COMMUNICATION

ACTION REQUEST

Subject: University of Michigan Health
Samuel and Jean Frankel Cardiovascular Center
Positron Emission Tomography/Computed Tomography Scanner Project

Action Requested: Approval to Proceed with Project

Background:

This project will renovate the existing single photon emission computed tomography room on level one to create a Positron Emission Tomography/Computed Tomography (PET/CT) room. The renovation will include approximately 6,200 gross square feet, install additional shielding, and a dedicated pneumatic tube delivery system from the Medical Science Building Cyclotron to the project site, increasing PET/CT capacity from two to three scanners. The scope of this project includes the architectural, electrical, and mechanical work necessary to accomplish these improvements. There will be no impact on parking from this project.

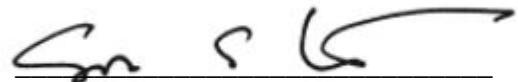

The estimated cost of the project is \$7,400,000. Funding will be provided from University of Michigan Health resources. The construction cash flow may be provided, all or in part, by bond proceeds or increasing the commercial paper issuance under the commercial paper program, secured by a pledge of General Revenues, and authorized by the Board of Regents. The architectural firm of Niagara Murano LLC will design the project. The project is expected to provide an average of 12 on-site construction jobs. Construction is scheduled to be completed in the fall of 2022.

We recommend that the Board of Regents approve the Samuel and Jean Frankel Cardiovascular Center Positron Emission Tomography/Computed Tomography Scanner Project as described and authorize issuing the project for bids and awarding construction contracts providing that bids are within the approved budget.

Respectfully submitted,

Marschall S. Runge, M.D., Ph.D.
Executive Vice President for Medical Affairs and
Dean, Medical School

Geoffrey S. Chatas
Executive Vice President and
Chief Financial Officer
