

THE UNIVERSITY OF MICHIGAN
REGENTS COMMUNICATION

ACTION REQUEST

Subject: Subcontract Agreement between the University of Michigan and the International Association for Dental Research

Action Requested: Authorization to enter into Agreement

Preamble:

A statutory conflict of interest situation was identified by the Office of Research and Sponsored Projects while reviewing the Proposal Approval Form which then triggered a review by the UMOR Conflict of Interest Review Committee. A plan for management of the possible risks associated with the conflict of interest was then developed and approved by the Committee and agreed to by the parties involved.

This proposed agreement (“Agreement”) falls under the State of Michigan Conflict of Interest Statute because Professor Nisha J. D’Silva, is an employee of the University of Michigan (“University”), and Treasurer of the Board of Directors for the International Association for Dental Research (“IADR”). The law permits such an Agreement provided it is disclosed to the Board of Regents (“Regents”) of the University of Michigan and approved in advance by a 2/3 vote.

Background:

Dr. Nisha J. D’Silva, a Professor in the Department of Periodontics and Oral Medicine in the School of Dentistry, is the Treasurer of the Board of Directors for a non-profit organization called the IADR (the “Company”). The Company wishes to fund a GlaxoSmithKline LLC (prime) project entitled “Injectable in-situ forming controlled release RvE1 gel for periodontal reconstruction” (ORSP# 19-PAF03399) in the Department of Cariology, Restorative Sciences and Endodontics under the direction of Dr. Marco Bottino. The purpose of this project is to develop an injectable and biodegradable in-situ forming RvE1 controlled release gel to fight chronic inflammation and support periodontal reconstruction.

Agreement Terms:

The terms of the Agreement conform to University policy. The period of performance for the project is approximately two (2) years. The amount of funding support will not exceed \$50,000. Since research projects are often amended, this agreement includes a provision for changes in time and scope. University procedures for approval of these changes will be followed and additional conflict of interest review will be done as appropriate.

Impact of the Agreement:

The Agreement will support an effort by Dr. Marco Bottino to use his expertise and University laboratory, as well as other University resources, to treat periodontal disease and will be further validated in a future pre-clinical large animal model of periodontitis.

Recommendations:

This matter has been reviewed and approved by the UMOR Conflict of Interest Review Committee. In light of this disclosure and our finding that the Agreement was negotiated in conformance with standard University practices, I recommend that the Board of Regents approve the University's entering into this Agreement with the International Association for Dental Research.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read 'S. Jack Hu', is positioned above the printed name.

S. Jack Hu
Vice President for Research
