

THE UNIVERSITY OF MICHIGAN  
REGENTS COMMUNICATION

ACTION REQUEST

Subject: Research Agreement between the University of Michigan and  
The Hope Foundation

Action Requested: Authorization to enter into Agreement

Preamble:

A statutory conflict of interest situation was identified by the Office of Research and Sponsored Projects while reviewing the Proposal Approval Form which then triggered a review by the Medical School Conflict of Interest Board. A plan for management of the possible risks associated with the conflict of interest was then developed and approved by the Board and agreed to by the parties involved.

This proposed research agreement (“Agreement”) falls under the State of Michigan Conflict of Interest Statute because Professor James Rae is an employee of the University of Michigan (“University”), and Secretary of the Board of Directors for The Hope Foundation. The law permits such an Agreement provided it is disclosed to the Board of Regents (“Regents”) of the University of Michigan and approved in advance by a 2/3 vote.

Background:

James Rae, PhD, a Professor in the Department of Internal Medicine – Hematology/Oncology, is the Secretary of the Board of Directors for a non-profit foundation called The Hope Foundation (the “Company”). The Company wishes to fund a project entitled “Hope Impact: Cannabidiol for treatment of aromatase inhibitor arthralgias in breast cancer” (ORSP #20-PAF05462) in the Department of Internal Medicine – Hematology/Oncology under the direction of Dr. Lynn Henry. The purpose of this project is to determine the effect of eight weeks of cannabidiol on joint pain, functional status, sleep, fatigue, cognition, anxiety, and depression.

Agreement Terms:

The terms of the Agreement conform to University policy. The period of performance for the project is approximately two (2) years. The amount of funding support will not exceed \$250,000. Since research projects are often amended, this agreement includes a provision for changes in time and scope. University procedures for approval of these changes will be followed and additional conflict of interest review will be done as appropriate.

Impact of the Agreement:

The Agreement will support an effort by Dr. Henry to use her expertise and University laboratory, as well as other University resources, to identify an effective treatment for aromatase inhibitor-associated musculoskeletal symptoms, which could improve the quality of life and, potentially, survival of patients with breast cancer.

Recommendations:

This matter has been reviewed and approved by the Medical School Conflict of Interest Board. In light of this disclosure and our finding that the Agreement was negotiated in conformance with standard University practices, I recommend that the Board of Regents approve the University's entering into this Agreement with The Hope Foundation.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read 'Rebecca Cunningham'.
