THE UNIVERSITY OF MICHIGAN
REGENTS COMMUNICATION

ACTION REQUEST

Subject: Regental Action Required Under the State of Michigan Conflict of Interest Statute

Action Requested: Authorization for the University to enter into a contract with Eidgenössische Technische Hochschule Zürich dba ETH Zürich (University employee Annalisa Manera is an employee at ETH Zürich).

Background:

The University of Michigan (“University”) through its College of Engineering seeks approval to enter into a contract with Eidgenössische Technische Hochschule Zürich dba ETH Zürich (“ETH Zürich”) for the purpose of research activities.

The proposed contract falls under the State of Michigan Conflict of Interest Statute because Annalisa Manera, Professor of Nuclear Engineering and Radiological Sciences at the College of Engineering, is an employee of the University and an employee at ETH Zürich.

The Statute allows the University to enter into such contracts if the following conditions are met:

a) The public servant promptly discloses any pecuniary interest in the contract to the official body which has power to approve the contract, which disclosure shall be a matter of record in its official proceedings.

b) The contract is approved by a vote of not less than 2/3 of the full membership of the approving body in open session without the vote of the public servant making the disclosure.

c) The official body discloses the following summary information in its official minutes:

   i) The name of each party involved in the contract.

   ii) The terms of the contract, including duration, financial consideration between the parties, facilities or services of the public entity included in the purchase, and the nature and degree of assignment of employees of the public entity for fulfillment of the contract.

   iii) The nature of any pecuniary interest.
The following information is provided in compliance with the statutory requirements contained in Section (c) above:

i) The parties to the contract are The Regents of the University of Michigan and its College of Engineering, and ETH Zürich.

ii) The contract is for ETH Zürich to provide sponsored research collaboration activities under a sponsored project from Fluor Marine Propulsion, LLC titled “Capacitance Wire Mesh System Design”. The performance period is anticipated to be October 1, 2021 through October 31, 2022, and is estimated not to exceed $112,696. The terms of the contract will comply with appropriate University requirements. Since projects are often amended, the contract will include provisions for changes in time, amount, and scope.

iii) The pecuniary interest arises from the fact that University employee Annalisa Manera is Professor of Nuclear Systems and Multiphase Flows at ETH Zürich. Annalisa Manera has met state law requirements with the disclosure of her pecuniary interest and formal appointment arrangements with the University. Requirements, if any, that may be applicable by the supervisors of Annalisa Manera or UMOR’s Conflict of Interest Committee’s procedures are separately analyzed and managed.

We recommend that the Board of Regents approve the University to enter into a contract with ETH Zürich, subject to requirements, if any, that the supervisors of Annalisa Manera or UMOR’s Conflict of Interest Committee may impose.

Respectfully submitted,

Geoffrey S. Chatas
Executive Vice President and Chief Financial Officer
