

THE UNIVERSITY OF MICHIGAN
REGENTS COMMUNICATION

ACTION REQUEST

Subject: License Agreement between the University of Michigan and Vasaragen, Inc.

Action Requested: Approval of License Agreement

Preamble:

A statutory conflict of interest situation was identified by the Office of Technology Transfer while reviewing the technology transfer agreement that then triggered a review by the Medical School Conflict of Interest Board. A plan for management of the possible risks associated with the conflict of interest was then developed and approved by this Board and agreed to by the parties involved in this plan.

This proposed license agreement (“Agreement”) falls under the State of Michigan Conflict of Interest Statute because Professor Gary D. Hammer is an employee of the University of Michigan (“University”) and a partial owner of Vasaragen, Inc. The law permits such an Agreement provided it is disclosed to the Board of Regents (“Regents”) of the University of Michigan and approved in advance by a 2/3 vote.

Background:

Gary D. Hammer, MD, PhD, a Professor in the Department of Internal Medicine – Metabolism, Endocrinology & Diabetes, is a partial owner of a for-profit company called Vasaragen, Inc. (the “Company”). The Company was formed recently to commercialize a novel strategy to treat adrenocortical carcinoma and desires to license from the University of Michigan the University’s rights associated with the following technologies:

UM OTT File No. 7801, entitled: “A Novel ACC-TCGA-Derived Molecular Assay to Stratify Adrenocortical Carcinoma (ACC) and Predict Clinical Outcomes” (Inventors: Gary D. Hammer, Antonio Marcondes Lerario, Dipika Mohan)

UM OTT File No. 2019-415, entitled: “A Novel ACC-TCGA-Derived Strategy for Molecular Classification of Adrenocortical Carcinoma (ACC) for Targeted Therapies” (Inventors: Gary D. Hammer, Antonio Marcondes Lerario, Dipika Mohan)

The Office of Technology Transfer selected the Company as a University partner and negotiated the terms of the proposed Agreement in accordance with University policy and its accepted licensing principles.

Parties to the Agreement:

The Regents of the University of Michigan and Vasaragen, Inc.

Agreement Terms Include:

Agreement terms include granting the Company an exclusive license with the right to grant sublicenses. The Company will pay a royalty on sales and reimburse patent costs. The University may receive equity in the Company, along with the right to purchase more equity.

The University will retain ownership of the licensed technologies and may continue to further develop and use them internally. No use of University services or facilities, nor any assignment of University employees, is obligated or contemplated under the Agreement. Standard disclaimers of warranties and indemnification apply, and the Agreement may be amended by consent of the parties, such as adding related technology. University procedures for approval of these changes will be followed and additional conflict of interest review will be done as appropriate.

Pecuniary Interest:

The pecuniary interests of Dr. Hammer arise from his ownership interest in Vasaragen, Inc.

Net Effect:

The Office of Technology Transfer has negotiated and finalized the terms of a worldwide exclusive license agreement for patents related to UM OTT File Nos. 7801 and 2019-415 for all fields of use. Vasaragen, Inc. will obtain use and commercialization rights to the above listed University technologies.

Recommendations:

This matter has been reviewed and approved by the Medical School Conflict of Interest Board. In light of this disclosure and our finding that the Agreement was negotiated in conformance with standard University practices, I recommend that the Board of Regents approve the Agreement between the University and Vasaragen, Inc.

Respectfully submitted,

Rebecca Cunningham
Vice President for Research
