

THE UNIVERSITY OF MICHIGAN  
REGENTS COMMUNICATION

ACTION REQUEST

Subject: Regental Action Required Under the State of Michigan Conflict of Interest Statute

Action Requested: Authorization for the University to enter into a contract with Battel Engineering (University of Michigan Employee, Steven Battel, Owner).

Background:

The University of Michigan College of Engineering, Department of Climate and Space Science and Engineering seeks approval to enter into a contract with Battel Engineering for consulting services supporting the development of a Faraday cup-style solar wind ion instrument.

The proposed agreement falls under the State of Michigan Conflict of Interest Statute as Steven Battel is a University employee as Adjunct Clinical Professor with Climate and Space Science and Engineering and would be party to the agreement as owner of Battel Engineering.

However, the Statute allows the University to enter into such agreements if the following conditions are met:

- a) The public servant promptly discloses any pecuniary interest in the contract to the official body which has power to approve the purchase, which disclosure shall be a matter of record in its official proceedings.
- b) The purchase is approved by a vote of not less than 2/3 of the full membership of the approving body in open session without the vote of the public servant making the disclosure.
- c) The official body discloses the following summary information in its official minutes:
  - i) The name of each party involved in the contract.
  - ii) The terms of the purchase, including duration, financial consideration between the parties, facilities or services of the public entity included in the purchase, and the nature and degree of assignment of employees of the public entity for fulfillment of the purchase.
  - iii) The nature of any pecuniary interest.

The following information is provided in compliance with the statutory requirements contained in Section (c) above:

- i) The parties to the contract are the Regents of the University of Michigan and its Department of Climate and Space Science Engineering and Battel Engineering.
- ii) The agreement is a two-year agreement at a total cost not to exceed \$204,250. Battel Engineering will be supplying all the necessary resources and personnel to fulfill this contract. The remaining base contract terms and conditions are typical to those used in Procurement Services standard templates for other similar contracts entered into by the Regents
- iii) The pecuniary interest arises from the fact that University of Michigan employee, Steven Battel, is owner of Battel Engineering.

Steven Battel has met state law requirements with the disclosure of his pecuniary interest and formal appointment arrangements with the University of Michigan. Requirements, if any, that may be applicable by the supervisor of Steven Battel, under the Medical School's or OVPR's Conflict of Interest Committee's procedures are separately analyzed and managed.

We recommend that the Board of Regents approve the agreement between the University of Michigan and Battel Engineering subject to requirements, if any, that the supervisor of Steven Battel or the Medical School's or OVPR's Conflict of Interest Committee may impose.

Respectfully submitted,

Geoffrey S. Chatas  
Executive Vice President and Chief Financial Officer
