

AWARDS ESTABLISHED
 Research and Other Sponsored Activities
 July 1, 2014 through August 31, 2014

The awards detailed in this list were established July 1, 2014 through August 31, 2014. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

The period of July-August 2014 saw an increase in the total number of awards and a modest increase in the total amount of awards compared to the same period in 2013. The year-to-date of July-August 2014 saw the most awards ever recorded for this time period. Training grants saw a significant decrease between FY2014 and FY2015 both in number as well as total award amounts. While July saw the largest number of awards in the past five years, the total award amount for July was the lowest in the last three.
