

The University of Michigan  
REGENTS COMMUNICATION

ACTION REQUEST

Subject: Center naming

Action Requested: Name a new advanced imaging center in Troy

Proposed Name: Sidney and Madeline Forbes Advanced Imaging Center

Background:

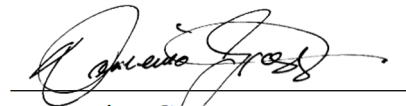

Longtime supporters of the University of Michigan Sidney and Madeline Forbes have made a lead gift to help fund the design and construction of a new advanced imaging center in Troy employing the latest imaging technology and groundbreaking treatment capabilities. The state-of-the-art center will facilitate earlier diagnoses and more effective therapies for cancer and a wide range of diseases and trauma.

Demand in the state for the advanced imaging services that are transforming health care is increasing. The new advanced imaging center will facilitate earlier diagnoses, targeted therapies, and increased access to radiology services in complex and urgent situations.

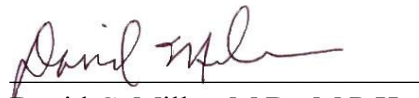

It will further our expertise, which extends from precise diagnostics and life-changing procedures to cultivating medical excellence and driving the research that redefines health care possibilities.

In acknowledgement of Sidney and Madeline Forbes' exceptional generosity to U-M and this significant commitment, we recommend that the Board of Regents approve naming the facility the Sidney and Madeline Forbes Advanced Imaging Center, effective immediately.

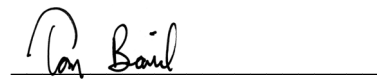

Respectfully submitted,

Domenico Grasso  
President

David C. Miller, M.D., M.P.H.  
Executive Vice President of Medical Affairs  
CEO, Michigan Medicine

Thomas A. Baird  
Vice President for Development

Geoffrey S. Chatas
