

AWARDS ESTABLISHED
Research and Other Sponsored Activities
July 1, 2012 through October 31, 2012

The awards detailed in this list were established July 1, 2012 through October 31, 2012. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

The receipt of a \$28.4 million award caused the large increase in the dollar value of total awards processed for October 2012. The award was made to the University of Michigan Cancer Center. In addition to this large award there were 27 other awards processed in excess of \$1.0 million representing over 10.0% of the total number of awards processed.
