

AWARDS ESTABLISHED
Research and Other Sponsored Activities
July 1, 2015 through October 31, 2015

The awards detailed in this list were established July 1, 2015 through October 31, 2015. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

October 2015 saw an overall increase in number and total awarded amounts as compared to October 2014. This increase was due in part to three awards in the College of Pharmacy and School of Public Health from Health and Human Services totaling over \$23 million. The month also saw an increase in the number and total amount of awards with individual sponsor amounts of up to \$800,000, with a 21% increase in number awarded and 33% increase in total amounts as compared to October 2014. In the research awards category, the increase in the \$200,000-\$400,000 range for October 2015 was nearly double that of October 2014. The decrease in other sponsor activity is largely due to two, atypically large, awards from October 2014 totaling over \$16 million that did not reoccur in October 2015. Disregarding these, the total award amounts for the other sponsored projects category increased 65% from October 2014 to October 2015.
