AWARDS ESTABLISHED
Research and Other Sponsored Activities
July 1, 2013 through November 30, 2013

The awards detailed in this list were established July 1, 2013 through November 30, 2013. The dollar values depict the best available estimate of the funding the University should receive over the life of the award. These values may be modified as additional data become available relative to future funding prospects. These modifications are not reported in the attached list. As a result, the dollar values of awards presented in this list will differ from the year-end totals. The full amount of an award is recorded in the year in which it was established. Often these funds are expended over several years, making comparisons between awards and expenditures somewhat misleading. Research expenditures are presented here to provide a trend line for the current fiscal year.

Other Sponsored Activity	427	530	24.1%	\$ 54,738,694	\$ 64,159,693	17.2%

November 2013 saw an additional 29 awards as compared to November 2012. November 2013 also saw an additional 38 projects awarded under Other Sponsored Activity primarily for clinical trials for a 54.5% increase in Other Sponsored Projects award amounts between November 2012 and November 2013. However, while the total number of awards increased 15.1% from last year, research awards and research training categories both saw a drop in total awarded amounts from November 2012 to November 2013, primarily due to a reduction in number and amount of federal direct sponsor awards for those categories.
